PROFILE

As a SharePoint developer, I bring expertise in designing and implementing solutions using Microsoft technologies. My focus is on delivering scalable, reliable, and user-friendly applications, with a strong emphasis on user experience and performance optimization. I am dedicated to creating innovative solutions that exceed expectations and drive results.

EXPERIENCE

Cognizant India Pvt. Ltd. Pune

Senior Associate | March 2022 - Present
Associate | April 2022 - March 2022

- Collaborated with a client to develop an employee experience platform using SharePoint Online and the Akumina employee experience platform.
- Conducted thorough requirement-gathering sessions to understand the client's needs and translate them into actionable technical requirements.
- Managed sprint planning and retrospectives, ensuring that the development process was efficient and effective.
- Successfully managed technical deliverables and timelines, delivering high-quality results on time.
- Worked closely with team members to identify and address technical issues, resulting in a more stable and reliable platform.
- Contributed to the development of best practices and process improvements, promoting continuous improvement and innovation.

Cognizant, The Netherlands (Onsite)

Associate | September 2019 - April 2021

- Designed and developed custom SharePoint solutions using SharePoint Framework, SharePoint Designer, and Visual Studio.
- Built custom web parts and applications to meet specific business needs and improve user experience.
- Developed and maintained SharePoint sites and subsites, ensuring consistent branding and optimal performance.
- Participated in code reviews, providing constructive feedback to team members and promoting continuous improvement.

Cognizant India Pvt. Ltd. Pune

Programmer Analyst | May 2017 - September 2019
Programmer Analyst Trainee | May 2016 - May 2017

- Successfully configured search functionality in both SharePoint 2013 and SharePoint Online, improving user experience and making it easier to find content.
- Utilized my expertise in SharePoint theming to customize SharePoint themes and align them with client specifications, resulting in a more cohesive and professional look and feel.
- Designed and developed comprehensive REST APIs using the .NET framework.
